

Technical Lead

(job ID: #1004-cf)

Status: Full time contract to hire

Compensation: Based on experience

ColdData, LLC is a full service healthcare E-marketing agency dedicated to bringing our clients innovative e-solutions through the use of advanced online technologies. The main office is located in Calabasas, California.

We are looking for a strong technical lead for implementing solutions to meet our customers' requirements. The person must be able to lead a team of developers to the successful implementation of ColdData's projects and will act as a liaison between developers, project managers and business analysts.

Responsibilities

- Lead, train and mentor the team of ColdData developers
- Evaluate customer requirements for technical feasibility, conduct technical assessments
- Hands-on design and programming whenever required
- Create and maintain project technical specs and design documentation
- Interact with technical members of the customer's staff / vendor when necessary to get complete clarification on different subjects, documenting the understanding and work with the project PM to get a sign-off on the understanding.
- Provide project status updates to the PM and enforce deadlines between developers
- Participate with the PM in client conference calls throughout the various phases of the project

Qualifications

- Strong leadership skills with excellent interpersonal, verbal/written communications and problem solving skills
- 4+ years experience in Object Oriented technologies and 2+ years experience as a technical lead
- Expert level knowledge and hands-on experience in Java, JDBC, JSP, J2EE, WebLogic, XML, Oracle, UNIX shell scripting
- HTML/DHTML/JavaScript
- Extensive knowledge of LDAP, web and application servers and their administration
- Ability to pickup new technologies, solve complex technical problems and multitask between different projects
- Knowledge of Mac OS X, Photoshop, Acrobat (PDFs), Illustrator, DreamWeaver, & Flash a plus
- Fluent in Russian language is a strong plus
- Experience in healthcare/biotech industry is a plus
- Bachelors Degree in Computer Science or equivalent
- **No H1 VISA sponsorship** at this point – local hires only. All non-qualified applications are discarded immediately.
